

Empathy Map

SAYS

- "I never know which crop will actually do well this season."
- "Last season's harvest was poor — I picked the wrong crop for the soil."
- "I wish there was an easy way to check what to plant before I invest money and time."
- "The weather has changed so much, old methods don't work anymore."

THINKS

- "Am I wasting money on fertilizer for a crop that won't even suit my land?"
- "I don't fully trust my own guesswork anymore."
- "Technology could probably help, but is it made for someone like me?"
- "I hope this season goes better than the last."

Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

DOES

- Asks neighboring farmers or local agriextension officers for crop advice • Relies on

traditional/inherited farming knowledge passed down through generations • Occasionally searches online or asks in WhatsApp farming groups • Tests soil informally based on

FEELS

- Anxious about financial loss from a bad harvest
- Frustrated by unpredictable weather and outdated methods
- Hopeful that a simple, reliable tool could reduce uncertainty
- Relieved and confident when given a clear, databacked recommendation
